

TELUS Office Tour

TELUS Pre-Approved CPA Program

Looking to get your CPA while working in a high-performing, sustainable, innovative, and team-oriented environment? Then the **TELUS Pre-Approved CPA Program** might just be right for you.

Since its inception, TELUS has always performed at the top of the telecommunications industry. The company prides itself in providing the best network accompanied with leading customer service, an achievement that is only possible by building a workforce that is diverse, inclusive, high-performing, engaged, and motivated. Among the company's esteemed accolades are several finance-related awards including the 2017 CPA Award of Excellence in Corporate Reporting. This was made possible by having top finance and accounting talent mixed with the company's core values of integrity and transparency.

The **TELUS Pre-Approved CPA Program** is an exciting three-year rotational program that has been approved by the respective provincial CPA (formerly CA) institutes to train students outside of external audit/public practice. The program has provided participants with a range of opportunities to develop core competencies in accounting for more than 50 years. Successful program alumni have progressively moved into leadership positions within TELUS. With the transition to CPA, we continue to evolve and provide best in class practical experience and training support to our team members.

We invite you to attend our [summer office tour](#) in our Vancouver head office to gain a glimpse into the TELUS workstyles and learn more about the Pre-Approved CPA program.
